

Just now (<1s) 52 Python

```
from pyspark.sql.types import DecimalType
import pyspark.sql.functions as F

df = spark.createDataFrame([("WVL381", )],["String"]).withColumn("Decimal", F.col("String").cast(DecimalType(38,0)))
df.display()
```

(3) Spark Jobs

df: pyspark.sql.dataframe.DataFrame = [String: string, Decimal: decimal(38,0)]

Table + New result table: ON Search

	String	.00 Decimal
1	WVL381	null
